# OME Features

## NITROCHARGER SPORT SHOCK ABSORBERS

### LARGE BORE 35MM TWIN TUBE DESIGN

Allows greater oil volume for cooling and sustained valving performance and strong 1.6mm outer tube construction protects the vital internal components from damage.

### LARGE 18MM HARDENED CHROME PISTON ROD

Strong enough to handle any load or harsh conditions expected from your 4x4.

### TRIPLE LIP CHECK VALVE OIL SEAL – MK2

The latest technology in oil seal design – physically larger with quantum improvements in durability, oil and gas retention with much greater resistance to heat so it keeps working under the harshest conditions.

### TEFLON-IMPREGNATED LOW FRICTION ROD GUIDE

The latest refinement in rod guide design further reduces heat build-up and maintains performance.

### TEFLON-INFUSED BRONZE ROD GUIDE

#### SLIP RING

A new component that maintains consistent and uniform performance by providing a tight and uniform fit between the piston rod and rod guide.

### MULTI DEFLECTIVE DISC VALVING SYSTEM

A unique and new valving system that features multiple disc valving control at the base of the shock and on both sides of the piston rod. This allows the OME engineers more valving options for better ride quality and handling control.

### 35MM HIGH FLOW TEFLON-BANDED PISTON

New low friction design has less restrictive oil flow through the piston, reduces heat build-up and aeration of the oil that leads to fade.

### VEHICLE-SPECIFIC VALVING

OME shock absorbers performance stand head and shoulders over its competitors because many hours of OME engineering valving work have been put into each and every shock absorber to ensure our customers get the best ride and handling their vehicle can have.

### POLYETHYLENE DIRT SHIELD

Impact-resistant, polyethylene dirt shield provides additional protection from stone chips and off road debris.

### NITROGEN GAS

Increases the temperature operating range and improves oil flow through the valving, ensuring optimum performance.

### SUPPLEMENTARY WELDS

For strength and reliability, all mounts have supplementary welds.

## NITROCHARGER SHOCK ABSORBERS

### GIANT 18MM CHROMED SHAFT

Indestructible for Australia's rugged off roading. Induction hardened then hard chromed to a superfine finish.

### NITROGEN GAS

The gas pressure keeps the oil cohesive under all situations.

### TWIN TUBE DESIGN

33% thicker outer tube insures that rocks do not damage internal operating components. This design also allows for a greater volume of oil, which keeps the shock cooler.

### 35MM SEVEN STAGE COMPRESSION VALVE

Delivers all the subtleties of compression rates for the best ride and handling.

### CHECK VALVE SEAL

The latest in seal technology, this shaft seal significantly improves gas retention whilst offering excellent longevity.

### GLACIER BUSH

A Teflon-coated rod guide bush significantly reduces heat build-up in the rod guide area, developed from the Emu's off road racing program.

### GIANT 35MM TEFLON-BANDED PISTON

A new four-stage coil-sprung rebound valve system to control vehicle bounce.

### SUPPLEMENTARY WELDS

On all mounting eyes and pins for maximum shock absorber mount strength.

### STONEGUARD

Protects oil seal and piston rod against stone and dirt damage.

### X5K MICRO-ALLOYED SPRING STEEL

New generation high strength spring steel grade designed to withstand higher operating stresses with superior resistance to sag and improved toughness and corrosion fatigue properties.

### COIL SPRINGS

#### SHOT-PEENED

To reduce stress, which greatly enhances spring life.

#### DOUBLE-SCRAGGED

To eliminate spring sag.

#### VARIABLE AND CONSTANT RATE

Designs used to obtain optimum ride comfort and load-carrying capabilities.

#### COIL SPRUNG 9 STAGE VALVING

For optimum performance.

### STEERING STABILISERS

#### 35MM PISTON & BORE

Greater oil volume giving better damper performance.

### TWIN TUBE DESIGN

Protects the internal components against stone damage.

### STEEL STONEGUARD

Protects the piston rod against stone damage.

### FOAM CELL

Keeps the oil at the valving to prevent fade.

### ORIGINAL MOUNTS

All mounts are of similar design to original stabilisers for ease of fitment.

### LEAF SPRINGS

#### FLAT AXLE SEAT AREA

Lowers spring stress whilst retaining spring-free camber height. Unique to most OME springs.

#### ANTI-FRICTION INTERLEAF LINERS

Used where applicable to reduce friction between spring leaves, giving better ride comfort and increased spring life.

#### SHOT-PEENED

On the tension side of all leaves to double spring life.

#### DRAW-TAPERED & DIAMOND CUT LEAVES

For reduced interleaf friction and improved load distribution in the load-bearing area.

#### GRAPHITE-COATED

For further reduced friction.

#### MILITARY-WRAPPED

For extra safety (where fitment permits).

#### LOOSE-CLAMPED

For smooth and quiet operation.

### URETHANE BUSHES - LEAF SPRING

#### PREMIUM GRADE

Not all bushes are the same - OME bushes are precision moulded in captive moulds to ensure exact tolerances for long bush life.

#### SPLINES

Ensures the best fit by taking up irregularities in spring eyes.

#### UNIQUE OME DESIGN

Clever lip seal and shoulder design prevents dirt penetrating between bush shoulder and shackle face.

### GREASEABLE SHACKLES

#### REDUCED WEAR

Greasable shackles reduce shackle pin deterioration, increase bush life, enable easy maintenance and improve ride and handling.

#### ANTI-INVERSION FACILITY

Built-in feature on all LandCruiser greasable shackles.

#### SERVICING

Simple and effective.

#### WARRANTY

For a copy of ARB's Warranty Policy, ARB Products: Warranty Against Defects, please visit the ARB website.

## Terminologies & Explanations

Please note most suspension development has been carried out on Australian specification models. Therefore, some differences may exist between the same model in another country. Overseas customers will need to make allowances for these possible differences.

Supplying all items shown on suspension selection charts will ensure the system can be fitted, however, there will be vehicles which will not require all items, eg. trimming kits, caster kits, all U bolts shown, etc. Actual individual vehicle requirements can only be determined when the suspension system is fitted.

**GVM - GROSS VEHICLE MASS:** Set by the vehicle manufacturer and is determined by brake, axle, differential and tyre specifications. Exceeding GVM ratings can have legal and safety implications and is not recommended.

**LOAD RATING - FRONT:** Weights shown are maximum permissible loads with regard to accessories fitted, eg. Bull bar, winch, dual battery, etc.

**LOAD RATING:** The explanations below indicates the passenger and load weights that will provide optimum ride and handling.

**REAR:**

**LIGHT LOAD:** Full passenger load with luggage weights up to 150kg.

**MEDIUM LOAD:** Full passenger load with luggage weight varying from 200kg to 350kg.

**CONSTANT LOAD:** The minimum constant load shown on selection chart is required for optimum spring performance.

Please note: These loads are approximate only. Refer to individual vehicle selection for load specifications.

**LIFT HEIGHT:** Is shown as a guide only and equates to the amount of lift over the vehicle's original ride height. This amount can vary from vehicle to vehicle.

**OE:** Original Equipment, as supplied by the manufacturer of the vehicle.

**SHOCK ABSORBERS:** Where two part numbers are given for the same application the part with the asterisk (\*) indicates the shock absorber with the firmer ride.

**SPRING BUSH:** OME polyurethane spring eye bushes on installation must only be greased in the bore and on the flange area and regularly thereafter with OME polyurethane grease.

**STEERING STABILISER:** Designed as a larger capacity replacement for the OE part and incorporates 50/50 neutral valving.

**CASTER KIT:** The OMECA77B, CALR1 and CALR2 kits consist of 4 eccentric bushes which are pressed into the leading arms of the vehicle. This will induce positive caster into the front geometry.

**LEAF SPRINGS:** A & B springs can be used to compensate for uneven vehicle weight distribution. Springs marked "A" have a greater camber height than springs marked 'B'. 'A' type springs are generally fitted to the driver's side and 'B' springs to the passenger side.

**COIL SPRINGS:** A & B springs are used to compensate for uneven vehicle weight distribution. 'A' type springs are generally higher in free high than the 'B' spring. Individual coil specifications are listed in the back of this publication.

**GEARBOX PACKER KIT:** Designed to space down the gearbox cross member from the chassis to reduce tail shaft flange angle thereby reducing driveline vibration.

**GREASABLE SHACKLES:** Replacement for original shackles allow easy regular greasing of polyurethane spring eye bushes.

**TRIM PACKERS:** The prime purpose of a trim packer is to correct slight vehicle leaning.

**VEHICLES WITH LEAF SPRINGS UNDER SLUNG:** Trim packer when fitted will reduce suspension height.

**VEHICLES WITH LEAF SPRINGS OVER SLUNG:** Trim packer when fitted will increase suspension height.

**VEHICLES WITH COIL SPRINGS:** Polyurethane trim packer main purpose is to correct slight vehicle trimming problems and will increase ride height when fitted.

# NITROCHARGER SPORT SELECTION

## SELECTION ADVICE

Where there is a choice of part numbers it is important the right selection is made with consideration given to type of spring rates and customer applications.

### Firm Valving

The firm part number should be selected whenever heavy rate springs are fitted, as the valving has been specifically developed to control the higher spring rates. The firmer valving will provide better control when cornering, while also preventing axle bounce over rough roads.

If a softer valved selection is fitted with a heavy rate spring the vehicle's rebound handling will be reduced. This will be evident by axle bounce over rough roads, dipping under braking or cornering and wallowing over undulating roads.

### Soft Valving

Valved specifically for light to medium rate springs. Most suitable for customers wanting a comfortable ride and regularly carry light to medium loads. Under full GVM load a slight amount of body roll during cornering and highway speed manoeuvring can occur.

## A RECOMMENDATION FOR CUSTOMERS BUYING 4 REPLACEMENT SHOCK ABSORBERS

By the time a customer has decided to replace the old and well used original shock absorbers there is every chance that the original springs are also ready for replacement.

It should be explained to the customer that if their springs are sagged and tired that this would cause the shock absorbers to work a lot harder.

Therefore, the life expectancy of the shock absorbers will be considerably shortened and, when loaded, ride and handling qualities will also be reduced.

**REMEMBER: A good set of shock absorbers will not overcome a bad set of springs.**

	Amarok V6 Diesel	90013 <sup>23,24,30,36</sup>	60083 <sup>25</sup> / 60082 <sup>25</sup>	

NOTES: \*first part number has firmer valving.

- Shock lower body stone guards are recommended fitment to rear shocks to protect against severe stone peppering encountered on loose road surfaces. OME661 (suits Sorento BL To 09, FJ Cruiser 06 On, 4 Runner 10 On & 03 to 10 USA models, LandCruiser 76 LWB, 80, 100, 105, 200 Series, Prado 150 09 on coil sprung not Kakadu, 120 Series 10/02 to 09 not TEMS & Prado 90 Series to 10/2002 LWB). OME662 (suits LandCruiser 105 & 80 Series with 34mm diameter Control Arm, 100 Series IFS AHC with 40mm diameter Control Arm). OME660 (suits all other models).
- It may be necessary to slightly increase the clearance in the front wishbone to allow the shock absorber to fit. Do not modify the shock absorber.
- FK18 rear sway bar extension bracket for LWB Models and FK24 for SWB Models are **mandatory** fitments with Nitrochargers to prevent damage to sway bar due to increased wheel droop.
- FK22 support brackets must be installed to upper shock mounting brackets on late 1996 on models manufactured in Thailand.
- Original struts and OME coils cannot be used together. No top mounting bushes and dirt shield supplied, re-use OE bushes and dirt shield.
- OMESD35 will suit D21 models only.
- 60043 is 20mm longer and must only be installed to right hand side.
- OMEB11 bush kit is required to convert lower 19mm bush to 16mm ID.
- OMESD40 will only fit left hand drive models.
- FK16 20mm bump stop spacer kit is a **mandatory** fitment.
- No top mounting bushes supplied, re-use OE bushes.
- When remaining stock is exhausted no further product will be available.
- No top mounting bushes supplied, refer to vehicle specific application to select relevant upper strut bushes. OE bushes may be re-used if in good condition.
- FK42 is a **mandatory** fitment to space sway bar link away from shock absorber.
- OME front shock 60121 is not suitable as an OE replacement. When fitting our longer OME shock 60121 you must fit: FK71 brakeline kit to extend/drop the brakelines, FK72 sway bar kit to lower the front swaybar, FK70 radius arm drop bracket kit to 11 to 17 models, FK80 to 08 - 10 models as if not fitted you may over stretch the front brakelines.
- Re-use rear OE top damper forged bracket, bushes, dirt shield, bumpstops and fasteners for the assembly of the rear shock.
- No top mounting bushes supplied use OME3133 / OME3134 / OME3135, vehicle specific refer to vehicle selection page. OE bushes may be re-used if in good condition. OME struts can only be installed with OME coils.

Cont.

# NITROCHARGER SPORT SELECTION

**NOTES:** - (cont.) - \*first part number has firmer valving.

18. 60130 and 60131 **cannot** be used as a shock only OE replacement on Colorado 7/Trailblazer Models. Can be used as an OE replacement for Isuzu MU-X.
19. No top mounting bushes supplied use OME3121. OE bushes may be re-used if in good condition. No dirt shield supplied, please re-use OE.
20. Shock absorber 60140 is suited for constant rear loading in excess of 800kgs.
21. 1975 and newer FJ40's may need to use N76 shocks in rear: Pre 1975 shock eye in the top of the axle housing use N89/N95<sup>12</sup>/60032/60064. Post 1975 lower shock eye is below leaf spring use N76 with OMEB11 Bush Kit.
22. FK29 Rear Driveshaft Spacer is a **mandatory** fitment.
23. Top mount bump stop and bushes not supplied, re-use OE items.
24. For trimming purposes only, maximum 1 packer per strut.
25. OME665 Lower Shock Mount Stone Guard is **mandatory** fitment to rear shocks to protect against severe stone peppering encountered on loose road surfaces.
26. FK22 Front Shock Absorber Upper Mount Support Bracket Kit is a **mandatory** fitment.
27. When fitting 60018 / 60070 it is **mandatory** to fit longer coils 3062 - 3066 for springs to remain trapped with shocks fully extended, fit FK62 to prevent shock damage, fit FK63 for front driveshaft clearance and rear extended travel, fit FK64 which replaces OE upper shock mount when fitting rear shocks and remove any inner helper coils already fitted. **Caution:** Front driveshaft **MUST** be replaced / modified with Double Cardan Joints and checked for Uni bind with OME shocks installed at droop.
28. Caution: Due to altered gearbox mounts on models after 1998 any lift above OE ride height may cause front driveline vibration that can only be rectified by fitment of front Double Cardan Joints.
29. Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if Caster Kit is required. CALR1 suits 38mm wide control arms. CALR2 suits 44mm wide control arms.
30. Volkswagen Service Manual quotes that driveshaft bolts are a one use only. It is recommended to replace bolts. Replacement bolts Volkswagen Part Number N90991102 are to be sourced separately.
31. Suits 75mm and 100mm coils
32. Vehicle specific, refer to vehicle selection page for full details and to review **important** notification regarding modifications for off road use only along with warranty implications.  
JK Wrangler: refer page 34      Patrol GU Y61 & GQ Y60: refer page 74      LandCruiser 80 & 105 Series: refer page 98
33. For high articulation vehicles it is recommended to replace rear upper shock mount with FK64 and matching shock absorbers 60146 or 60147
34. Fitment of FK92 and FK93 are **mandatory**.
35. Fitment of LCAJLFR Front Lower Control Arm is **required** to restore wheel alignment castor settings.
36. To ensure correct 90012 and 90013 strut fitment please refer to fitting instruction part number 3787896 Amarok Strut Fitting Guide.
37. For front fitment reuse OE Top hat and Mounting Bushes. For rear fitment UBolts, Rear Spring Bush Kits and Leaf Spring Bolt Fitting Kit are additional requirements. Extra Leaf, Trim Packer and Centre Bolt are optional. Refer to the vehicle selection page for full details.
- 38 Headlight Sensor Fitting Kit FK97 is required when fitting all OME extended travel rear shock absorbers.

# NITROCHARGER SPORT SELECTION

## Remarks - (cont.):

### Warranty Implications

The fitter selling these shocks **must** inform the customer there is **no warranty** due to the severe nature of competition racing. The fitter must also note on the customer's receipt "racing application no warranty applies". This will prevent any future misunderstanding.

# NITROCHARGERS & STEERING STABILISERS

## SHOCK ABSORBER SELECTION ADVICE

Where there is a choice of part numbers it is important the right selection is made with consideration given to type of spring rates and customer applications.

### Firm Valving

The firm part number should be selected whenever heavy rate springs are fitted, as the valving has been specifically developed to control the higher spring rates. The firmer valving will provide better control when cornering, while also preventing axle bounce over rough roads.

If a softer valved selection is fitted with a heavy rate spring the vehicle's rebound handling will be reduced. This will be evident by axle bounce over rough roads, dipping under braking or cornering and wallowing over undulating roads.

### Soft Valving

Valved specifically for light to medium rate springs. Most suitable for customers wanting a comfortable ride and regularly carry light to medium loads. Under full GVM load a slight amount of body roll during cornering and highway speed manoeuvring can occur.

### A CAUTION FOR CUSTOMERS BUYING 4 REPLACEMENT SHOCK ABSORBERS

By the time a customer has decided to replace the old and well used original shock absorbers there is every chance that the original springs are also ready for replacement.

It should be explained to the customer that if their springs are sagged and tired that this would cause the shock absorbers to work a lot harder.

Therefore, the life expectancy of the shock absorbers will be considerably shortened and when loaded ride and handling qualities will also be reduced.

**REMEMBER: A good set of shock absorbers will not overcome a bad set of springs.**

**Remarks:**

Refer to page 172 to 175 of the OME International Application Catalogue for open and closed lengths of equivalent standard Nitrocharger models.

**NOTES:** \*first part number has firmer valving.

1. 1983 and on wide track CJ Jeeps require bush kit OMEB27 for the front lower mount and all Cherokee wagons and Mahindra lower front and rear mounts.
2. Shock lower body stone guards are recommended fitment to rear shocks to protect against severe stone peppering encountered on loose road surfaces. OME661 (suits Sorento BL To 09, FJ Cruiser 06 On, 4 Runner 10 On, LandCruiser 76 LWB, 200 Series, Prado 150 09 on coil sprung not Kakadu, 120 Series 10/02 to 09 not TEMS & Prado 90 Series to 10/2002 LWB). OME662 (suits LandCruiser 105 & 80 Series with 34mm diameter Control Arm, 100 Series IFS not AHC with 40mm diameter Control Arm). OME660 (all other models).
3. 1981 on F100 and Bronco require bush kit OMEB27 on bottom rear mount.
4. It may be necessary to slightly increase the clearance in the front wishbone to allow the shock absorber to fit. Do not modify the shock absorber.
5. FK18 rear sway bar extension bracket for LWB models and FK24 for SWB models are **mandatory** fitment with Nitrochargers to prevent damage to sway bar due to increased wheel droop.
6. FK22 Front Shock Absorber Upper Mount Support Bracket Kit is a mandatory fitment.
7. FK22 support brackets must be installed to upper shock mounting brackets on late 1996 on models manufactured in Thailand.
8. N208S can only be installed with OME Coil Springs. No top mounting bushes supplied, re-use OE bushes.
9. N179 suits models with single rear shock set up. Models with twin rear shocks require N179 fitment rear of axle, N180 front of axle, also fitment of OME660 stone shields are recommended on the N180.
10. OMESD40 will only fit left hand drive models.
11. To obtain maximum ride quality improvement it is recommended that an OME replacement stabiliser bar (OMESTAB1) be fitted.
12. OMESD35 will suit D21 models only.
13. Only suitable for models equipped with original steering damper.
14. Shocks are the same length as OE.
15. OME030<sup>18</sup> is shorter than OME029 and must be used with OE coils to ensure coils remain entrapped.
16. No top mounting bushes supplied, re-use OE bushes.
17. FK28 Bump Stop Spacer Kit is a mandatory fitment with N103S Struts.
18. When remaining stock is exhausted no further product will be available.
19. No top mounting bushes supplied, refer to vehicle specific application to select relevant upper strut bushes. OE bushes may be re-used if in good condition.
20. FK42 is a **mandatory** fitment to space sway bar link away from shock absorber.
21. Vehicles with ABS will require ABS Bracket Kit SMP638.
22. Front strut has 40mm longer travel than original equipment.
23. Rear shock has 50mm longer travel than original equipment.
24. 1975 and newer FJ40's may need to use N76 shocks in rear: Pre 1975 shock eye in the top of the axle housing use N89/N95<sup>12</sup>/60032/60064. Post 1975 lower shock eye is below leaf spring use N76 with OMEB11 Bush Kit.

**Note:** Replacement dust boot part numbers Nitrocharger: OME412422 - Small  
Replacement dust boot part numbers Nitrocharger: OME512422 - Large

# LTR REMOTE CANISTERS

Note: Replacement dust boot part numbers LTR: OME512422 - Large Black  
Replacement dust boot part numbers LTR: OME412422 - Small Yellow

## GASSING REMOTE CANISTER SHOCK ABSORBERS

The only recommended gas to use in LTR shock absorbers is Nitrogen. A Schrader valve, part number 2755, from Schrader Automotive Inc is required to guarantee correct pressure is reached. When using a Schrader valve to gas your LTR Shock absorber first set the pressure gauge to the required pressure. Attach the Schrader valve to the air fitting at the end of the remote canister. Gas the canister until the shock absorber shaft is fully extended, hold gas pressure for 30 seconds, release Schrader valve and remove.

Note: This can be done for you by your Old Man Emu Stockist.

Important: Gassing of your LTR shock absorber should be carried out before fitment to the vehicle. If LTRs are already fitted the vehicle's suspension should be at full extension before gassing.

## MINIMUM/MAXIMUM GAS PRESSURE

On Road/Off Road 40-80psi (2.8 - 5.5 BAR)

Competition 80-100psi (5.5 - 6.9 BAR)

An increase in gas pressure firms up ride quality but will not alter ride height.

## MAINTENANCE

The following checks need to be carried out as part of regular vehicle maintenance.

To ensure maximum cooling of your LTR shock absorber inspect the shock absorber body and canister for any mud and debris build up and clean if necessary.

Check that the polyurethane boot is securely fastened in place and that it is not damaged. If the boot is found to be detached thoroughly clean the shock absorber shaft and inside the boot before reattaching it.

Ensure all polyurethane bushes, locating washers and nuts are in good condition and securely fastened.

To ensure maximum shock absorber performance check gas pressure every 20,000km.

### NOTES ON ARMoured SUSPENSION SELECTION & FITMENT:

The above suspension systems have been designed and tested to suit a vehicle weight range of 3.9 - 4.5T, for vehicle weights outside this range please contact ARB.

Components have been designed to operate as a complete replacement system, it is not recommended to fit these products individually.

LC200 Armoured Suspension System was designed for and tested on non-KDSS equipped vehicles.

Y62 Armoured Suspension System was designed for and tested on non-HBMC equipped vehicles.

OME661 Lower Shock Stone Guards are recommended fitment for protection against stone damage on LC200.

All fitting kits, components and replacement bushes are included with the above products where required.

### REMARKS:

- 1 No top mounting bushes and dirt shield supplied, re-use OE bushes and dirt shield. Original struts and OME coils cannot be used together.
- 2 Tow Pack option uses a Nivomat (self leveling) shock absorber and requires a specific design.

**Please note:** when replacing Nivomat shocks, you **must** fit the appropriate OME spring.

To identify whether a vehicle has the standard fitment rear shock or Nivomat shock, the outer body diameter will need to be measured:

Standard: 51mm  
Nivomat: 63mm

**Fitting Time:** Due to the complexity of installation allow 4 hours for complete install.

## JEEP CHEROKEE XJ WAGON 1984 TO 2001

FRONT		PETROL & DIESEL ENGINES			<b>Warning:</b> XJ Models fitted with a 3 bolt engine exhaust pipe flange, can experience a clearance problem with the tail shaft, when suspension is under full deflection. Fitment of an adjustable front panhard rod or a change to the smaller 2 bolt flange will provide the required clearance.
<i>Estimated Lift: 35 - 45mm</i>		PART NUMBER	QTY	UNIT PRICE \$

NITROCHARGER SPORT		<b>60052</b>	2		
TRIM PACKER		OMEJGF10	1		
STEERING DAMPER		OMESD40	1		

REAR		ALL MODELS			<b>REMARKS:</b> 1 OMEU60 suits Dana 35 type differential - Australian Models. OMEU57 suits AMC 8 1/4 type differential.  2 Trimming requirement greater than 10mm use A/A fitment. Where near level rake is desired B/B fitment should be used. D22XL extra leaf can be fitted to CS034RA/B and CS035RA/B for heavier constant load carrying ability. <u>NB:</u> Models fitted with OE Up Country Suspension Pack will only be raised by 20mm.  3 OMEJGF10 front coil packer can be used for trimming or extra lift purposes, using no more than 1 packer.  4 Fit XJGK01 Gearbox Packer Kit should a driveline vibration occur.  5 OMESD40 will only fit left hand drive Models.

REAR UPPER CONTROL ARM - ADJUSTABLE	UCAJKRR [4]		
REAR ADJUSTABLE PANHARD ROD - LHD ONLY	PANRJL002 [4]		
TRIM PACKER	OMEJKPR10 [1]		

### REMARKS:

- 1 For trim adjustment use - Front: OMEJKPF10 Rear: OMEJLPR10. Do not fit more than one (1) packer per coil spring.
- 2 Fitment of LCAJLFR Front Lower Control Arm is **required** to restore wheel alignment castor settings.
- 3 Fitment of FK92 is **mandatory**. FK92 Bump Stop Kit prevents shock absorbers from going solid and fitment of larger tyres. Fitment of FK93 is **mandatory**. FK93 allows the shocks to extend freely without limit or contact.
- 4 Fitment not mandatory, however fitment will allow for fine tuning vehicle geometry.

**Lift increase is approximate and will depend on vehicles weights.**

When fitting larger than original diameter tyres, it is a requirement to fit aftermarket wheels (rims) that have a greater offset (less backspacing) to ensure that sufficient clearance is given between the tyre to sway bar, sway bar links and control arms.

**Notification Modifications for off road use only.**

The products listed in this selection chart are deemed by Old Man Emu to be suitable for off road use and their legality for public road use should be certified by the relevant Registration Authority. An Off Road Use Only Disclaimer must be signed by the customer.

Modifications and replacement of other associated components will be required.

**Notification: Modifications for off - road use only**

The products listed in this selection chart are deemed by Old Man Emu to be suitable for off road use and their legality for public road use should be certified by the relevant Registration Authority. An Off Road Use Only Disclaimer must be signed by the customer.

Modifications and replacement of other associated components will be required.

**Lift increase is approximate and will depend on vehicle weights.**

**Warranty Implications**

The fitter selling these shocks **must** inform the customer there is **no warranty** due to the severe nature of competition racing. The fitter must also note on the customer's receipt "racing application no warranty applies". This will prevent any future misunderstanding.

2012 Models with 3.6L engine will require exhaust or driveshaft modification to avoid contact of driveshaft and exhaust at full droop.

When fitting larger than original diameter tyres, it is a requirement to fit aftermarket wheels (rims) that have a greater offset (less backspacing) to ensure that sufficient clearance is given between the tyre to sway bar, sway bar links and control arms.

LEAF SPRING FRONT EYE BOLT KIT (optional)	FK95 [8]		

### REMARKS:

- 1 No top mounting bushes supplied, re-use OE Top Hat, Dirt Shield and Bump Stop.
- 2 OMESB102 suits OE Shackle.  
OMESB103 Bush Kit suits OME Greasable Shackle OMEGS20.
- 3 Use OMEU66 when fitting EL049R.  
Use OMEU66A when fitting EL068R and EL069R.  
Use OMEU66B when fitting EL069R with EL34XL.
- 4 Fitment of Driveline Spacer Kit FK57 is recommended to re-align driveline.
- 5 EL34XL will give approximately 30mm extra lift or increase loading capacity at design height by approximately 300kg.
- 6 If a TAD102 Frontier tank is installed in the vehicle, when fitting the FK57 spacer kit, the tank will need to be lowered to allow removal of the centre bearing bolts.
- 7 Trim Packer FK94 provides 10mm lift at the wheel.

8 FK95 is a recommended fitment if original leaf spring fixed eye nut bolts are in poor condition. Ensure correct torque specifications are used in supplied fitting instruction.

U BOLTS - WITH OVERLOAD LEAF	OMEU78 [5]	4	
EXTRA LEAF	EL40XL	2	
CENTRE BOLT- OVERLOAD ONLY	UCB21 [4]		

### REMARKS:

- 1 When fitting either 3075 or 3076 it is **mandatory** to fit Bump Spacer Kit FK73 to prevent the coil from being over stressed.
- 2 OME front shock 60121 is not suitable as an OE replacement. When fitting our longer OME shock 60121 you must fit:
  - FK71 Brakeline Kit to extend / drop the brakelines
  - FK72 Swaybar Kit to lower the front swaybar
  - FK70 Radius Arm Drop Bracket Kit, if not fitted you may over stretch the front brakelines
- 3 When bull bar and / or winch are fitted use FK74 on both coils to restore nominal lift height.
- 4 Where the OE rear leaf spring has an overload leaf fitted, this overload leaf is to be fitted to the OME leaf, EL077R is to have its centre bolt replaced with a longer bolt UCB21 and OE spacer blocks are to be reused.
- 5 Use OMEU77 when fitting to a vehicle without an overload leaf.
- 6 Use OMEU78 when fitting to a vehicle with an overload leaf.
- 6 Fitment of a FK81 Caster Correction Kit will provide approximately 3.5 to 4.0 degrees of extra caster. It is advisable to have a front end alignment carried out to determine if a FK81 kit is required.

U BOLTS - WITH OVERLOAD LEAF	OMEU67	[1]	
FITTING KIT	FK31	[3]	
	FK35		
SPACER KIT	OMESK1	[3]	

### REMARKS:

- 1 Springs are supplied with bushes fitted. Where the OE spring has an overload leaf fitted, it must be replaced with a TSXL01 and the CS048R original centre bolt replaced by a UCB10, the original spacing block must also be re-fitted using U Bolts OMEU67.
- 2 To maintain 50mm lift for loads over constant 600kgs add one (1) D27XL Extra Leaf.
- 3 Fitment of Driveline Spacer Kit FK31 for Crew Cab or FK35 for Xtra Cab is recommended to reduce possible driveline vibration. If required, additional spacing down of the centre bearing can be achieved by using an OMESK1 Spacer Kit.
- 4 Fitment of a FK36 Caster Correction Kit will provide approximately 3.5 to 4.0 degrees of extra caster. It is advisable to have a Front End Alignment carried out to determine if an FK36 kit is required.

STONE GUARD KIT	OME660 [2]	1		OME660 [2]	1	

**REMARKS:**

- 1 APRF250 Adjustable Panhard Rod **must** be fitted to allow original axle location to be restored, bushes are supplied in rod.
- 2 For F250 Models with dual shock fitment N179 **must** be fitted rear of the axle, as it is longer than the N180. For both F250 and F350 Models OME660 Stone Shields are also a recommended fitment to the rear shocks.
- 3 To help maintain 50mm lift, add one D27XL Extra Leaf for every 400kgs carried over 600kgs.
- 4 Fitment of FK31 to Crew Cab or FK35 to Xtra Cab Models is recommended to reduce possible driveline vibration.
- 5 As the CS048R has a different spring camber, compared to the original spring, the overload leaf **must** be replaced with a TSXL01. The Original spacing block **must** be refitted. Springs are supplied with bushing.
- 6 Springs are supplied with bushing.
- 7 Incompatible with F350 Dual Axle Model.

EXTRA LEAF	D26XL					

### REMARKS:

- 1 Raise or lower front end clearance and trim vehicle by adjusting front torsion bars. **Important:** A minimum of 60mm of droop must be maintained. It has been found, due to vehicle manufacturing tolerances, that in some cases front shock absorbers may contact the steering arm when on full lock. Fitter should check for this and where required a small indentation should be made to the body of the shock absorber. 303012 torsion bars have a lighter rate than OE and improve ride comfort for vehicles with no front accessory weight. Due to their heavy rate, the OE torsion bars are suitable for vehicles with front accessory weight.
- 2 Include tray weight in constant load calculation. CS062R and CS063R can be installed to high height 4x2 Models. OME leaf does not fit low height 4x2 Models.
- 3 FK26 only needed if not fitting Greasable Shackle Kit.

**REMARKS:**

**Caution:** Front driveshaft **MUST** be replaced / modified with Double Cardan Joints and checked for Uni bind with OME shocks installed at droop. FK62, FK63 & FK64 are mandatory fitment also.

- 1 When fitting coil springs recommended, you **must** use 60018 / 60070 shock absorbers to achieve minimum down travel requirement.
- 2 When fitting 60018 / 60070 the following are **mandatory** requirements:
  - \* Fit longer coils 3062 - 3066 for springs to remain trapped with shocks fully extended
  - \* Fit FK62 to prevent shock damage
  - \* Fit FK63 for front driveshaft clearance and rear extended travel
  - \* Fit FK64 which replaces OE upper shock mount when fitting rear shocks
  - \* Remove any inner helper coils already fitted
- 3 Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if Caster Kit is required. CALR1 suits 38mm wide control arms. CALR2 suits 44mm wide control arms.
- 4 8mm Steel Coil Seat Packer, refer to selection chart supplied with packer.  
**Important:** To prevent possible over stressing of the spring, only one packer can be fitted under each coil seat.
- 5 **Important:** 3064 has reduced spring rate from OE to provide improved ride quality for light loads.

**Notification: Modifications for off - road use only**

The products listed in this selection chart are deemed by Old Man Emu to be suitable for off road use and their legality for public road use should be certified by the relevant Registration Authority. An Off Road Use Only Disclaimer must be signed by the customer.

Modifications and replacement of other associated components will be required.

***Lift increase is approximate and will depend on vehicle weights.***

**Warranty Implications**

The fitter selling these shocks **must** inform the customer there is **no warranty** due to the severe nature of competition racing. The fitter must also note on the customer's receipt "racing application no warranty applies". This will prevent any future misunderstanding.

SWAY BAR EXT KIT	FK18	3	1			
	FK24					

### REMARKS:

- 1 Coil trim packers may be required to trim vehicles. Packers must be installed to the bottom of front coils.
- 2 OMECA77B Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required. FK25 may be required for some European Models when Caster Kit is fitted.
- 3 FK18: Rear Sway Bar Extension Bracket is **mandatory** fitment to Models with fixed sway bar to prevent damage to sway bar when suspension is at full extension. FK24 suits Models with detachable sway bar.
- 4 **Special Note:** Due to limited clearance between tailshaft and chassis cross member, OME does not recommend fitment of gear box packers.

- 5 OMESD11 steering damper fits all Models To 1/2000. OMESD01 fits 2/2000 On Models. To verify correct fitment for individual vehicles compare OE mounts with Steering Stabilisers Specifications on page 179.
- 6 It is highly recommended to reinforce coil towers if fitting heavy rear springs.
- 7 Fitment to vehicle with original exhaust, if larger exhaust fitted some modifications to exhaust may be required.

**REMARKS:**

- 1 OMESD01 fits 2/2000 On Models.  
OMESD11 fits all Models To 1/2000.
- 2 OMECA77B Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required.
- 3 FK25 x 2 Oil Pan Kits **must** be installed when OMECA77B Caster Kit or GQGK02 Gear Box Packer Kit are fitted.
- 4 FK18: Rear Sway Bar Extension Bracket is **mandatory** fitment to Models with fixed sway bar to prevent damage to sway bar when suspension is at full extension. FK24 suits Models with detachable sway bar.
- 5 GQGK02 Gear Box Packer Kit is designed to space down the gear box cross member from the chassis to reduce tail shaft flange angle thereby reducing driveline vibration. In some cases two (2) kits may be required.
- 6 Fitment to vehicle with original exhaust, if larger exhaust fitted some modifications to exhaust may be required.

STONE GUARD KIT	OME661	3	1	
	OME662	3		

- 1** Raise or lower front end clearance and trim vehicle by adjusting front torsion bars. It is **important** that a minimum of 60mm of droop is maintained to prevent topping out of the front shock absorbers.  
303001 suits V8 Models. 303002 suits Turbo Diesel Models.

NB: In some Middle Eastern Countries, 6 Cylinder Petrol LandCruiser 100 Series (IFS) use the longer turbo diesel torsion bars.

- 2** Packers must be installed on top of coils.

- 3** SPORT/NITROCHARGER FITMENT: OME661 or OME662 (suits 40mm diameter control arms). Lower Shock Mount Stone Guard is recommended fitment to rear shocks to protect against severe stone peppering encountered on loose road

- 4** Original rear rake is 60mm approximately with OE coil rates of 145lbs/in or 25.5N/mm. Customers wishing to lower the rear height but increase the load carrying ability can select from:

2866 - Reduces OE height by 10mm (rates 240 - 300lbs/in, 42 - 52.5N/mm)

2862 - Reduces OE height by 30mm (rates 240lbs/in, 42N/mm)

- 5** Due to the common problem of the lower control arm cracking when driven under hard conditions, the fitment of a FK27 Lower Control Arm Reinforcing Bracket Kit is strongly recommended.

**REMARKS:**

- 1 OMECA77B Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required.
- 2 Packers must be installed on the top of coil springs.
- 3 OME662 or OME661 Lower Shock Mount Stone Guard is recommended fitment to protect against severe stone peppering encountered on loose road surfaces. OME662 will only fit Models with 34mm diameter control arms.

**Notification: Modifications for off - road use only**

The products listed in this selection chart are deemed by Old Man Emu to be suitable for off road use and their legality for public road use should be certified by the relevant Registration Authority. An Off Road Use Only Disclaimer must be signed by the customer.

Modifications and replacement of other associated components will be required.

***Lift increase is approximate and will depend on vehicle weights.***

**Warranty Implications**

The fitter selling these shocks **must** inform the customer there is **no warranty** due to the severe nature of competition racing. The fitter must also note on the customer's receipt "racing application no warranty applies". This will prevent any future misunderstanding.

**REMARKS:**

- 1 OMECA77B Caster Kit will increase caster angle by 2°. Check manufacturer's specifications to determine if OMECA77B kit is required.
- 2 OMESB101: Use on original shackles and pins for 79 Series Models from 07/2009 On. OMESB84: Use on original shackles and pins for 79 Series Models To 06/2009. OMESB85: Use for all Models when installing OME greasable shackles and pins.

- 3 OMESD24 suits pre 2007 Models (open length 651mm). OMESD47 suits 2007On Models (open length 750mm).
- 4 Should the front drive shaft contact the sway bar when the suspension is at full droop, use FK19 Spacer Kit to pack the sway bar down.
- 5 Include tray weight in constant load calculation.
- 6 For heavily loaded applications it may be necessary to step down one spring selection in the front to maintain correct rake.
- 7 OMESTAB9 Sway Bar is highly recommended fitment when 800kg Constant Spring is used. Sway Bar can also be fitted to lighter rated springs to improve road handling. FK76 suits Models with OE axle sway bar mount. FK77 suits Models without OE sway bar provision.
- 8 For vehicles fitted with ABS brakes an ABS Wire Bracket Kit must be fitted. FK51 and FK58 are included in BP-51 Fit Kit. FK51 is for 200kg and 400kg Spring. FK58 is for 600kg and 800kg Spring. Due to Variance in tray clearance on 79 Series please check vehicle before selecting Fit Kit.
- 9 For vehicles fitted with ABS brakes, an ABS Wire Bracket Kit must be fitted. FK65 suits vehicles prior to August 2016 production. For vehicles post August 2016 production refer to PIB No. 343.
- 10 Required to be fitted to vehicles from 10/14 To 08/16.
- 11 Use OMEU59C if fitting Extra Leaf to EL082R.

**REMARKS:**

- 1 Vehicles with no front accessory weight will require the removal of the 4th leaf from the top of the spring stack. This is to maintain good shackle angle by not allowing the bump stop measurement to exceed 100mm.
- 2 Shackles: FK08 Anti Inversion Kit is mandatory fitment front and rear if greasable shackles are not fitted.  
Note: Spring Caster Wedge OMECW2 (2° Caster Wedges) may be required to restore positive caster angle. Front end alignment check will indicate required adjustment.
- 3 There can be 2 spigot sizes in the rear fixed end pins on 75 Series LandCruisers.  
Check for correct size before ordering greasable pins. Part numbers are:  
50mm spigot = OMEGP2.  
51mm spigot = OMEGP4.
- 4 Include tray weight in constant load calculation.
- 5 D16XL is suitable for CS006F.
- 6 When remaining stock of N92 is exhausted no further product will be available.
- 7 Excludes 1GR-FE Models.

SHOCK ABSORBER 2015 HILUX REAR LH	BP5160018L		
BP KIT HILUX 2015 REAR	VM80010019		

**REMARKS:**

- 1 To maintain coil clearance from the sway bar, the coil seat must be installed with the helix facing away from the sway bar.
- 2 No top mounting bushes supplied use OME3133. OE bushes may be re-used if in good condition.
- 3 Include tray weight in constant load calculation.
- 4 EL45XL will give approximately 20mm extra lift or increase loading capacity at design height by approximately 200kgs.
- 5 Strut Top Hat Kit may be required if original equipment is worn.
- 6 The Halogen Headlamp Levelling Bracket is a mandatory fitment for SR5 versions only.
- 7 Leaf Spring front eye bolt 6151539 required for fuel tank side and is available as a spare part. Refer to the Spare Parts Price List for pricing.

8 Use OMEU53A for EL089R and EL090R.  
Use OMEU53B for EL090R with extra leaf and EL091R.

9 When adding Extra Leaf to EL091R please add UCB19.

# TOYOTA

CENTRE BOLT	UCB17		

### REMARKS:

- 1 Top mount bump stop and bushes not supplied, re-use OE items.
- 2 For trimming purposes only, maximum 1 packer per strut.
- 3 Workshop fitting kit FK33 recommended for easier bush install (note: one FK33 kit required per workshop).
- 4 OME665 Lower Shock Mount Stone Guard is **mandatory** fitment to rear shocks to protect against severe stone peppering encountered on loose road surfaces.
- 5 D38XL will give approximately 12mm extra lift or increase loading capacity at design height by approximately 160kgs.
- 6 To achieve 20mm lift for bar and winch, OME95PF5 will need to be fitted with 3080 coil.
- 7 Volkswagen Service Manual quotes that driveshaft bolts are a one use only. It is recommended to replace bolts. Replacement bolts Volkswagen Part Number **N90991102** are to be sourced separately.
- 8 To ensure correct 90012 and 90013 strut fitment please refer to fitting instruction part number 3787896 Amarok Strut Fitting Guide.

**Fitting Time: Due to the complexity of installation allow 5 hours for complete install.**

**X5K MICRO-ALLOYED SPRING STEEL** is a new generation high strength spring steel grade designed to withstand higher operating stresses with superior resistance to sag and improved toughness and corrosion fatigue properties. These properties are enhanced by additions of Silicon, Chromium, Vanadium Nickel along with lower Carbon than conventional spring steel grades.

# RECOMMENDED FITTING TIMES

## COIL SPRINGS SYSTEMS

All Coil Spring Models (Except Land Rovers)	2.0 hours
Fitment of 4 Shock Absorbers & 4 OME coil springs	
Land Rover All Coil Spring Models	2.5 hours
Fitment of all the above plus additional time to remove front shock absorber towers	
Torsion Bar Front with Rear Coil Suspension	2.0 hours
Fitment of 4 Shock Absorbers, 2 OME coil springs & front torsion bar adjustment	
Coil Front with Rear Leaf Suspension	3.5 hours
Fitment of 4 Shock Absorbers, 2 OME coil springs & 2 OME Leaf springs	
Coil Over Front Strut with Rear Coil Suspension	3.0 hours
Fitment of 2 Shock Absorbers, 2 OME struts & 4 OME coil springs	
Coil over Front Strut with Leaf Rear Springs	4.0 hours
Fitment of 2 Shock Absorbers, 2 Struts, 2 Coils & 2 Leaf Springs	

## LEAF SPRING SYSTEMS

All Leaf spring Models (Except HiLux)	5.0 hours
Fitment of 4 Shock Absorbers, 4 OME Leaf Springs, and U bolts and spring bushes as required	
Toyota HiLux All Leaf Spring Models	6.0 hours
Fitment of all the above plus additional work required to strengthen front spring seat mount	
Front Torsion Bar with Rear Leaf Spring Models	3.0 hours
Fitment of 4 Shock Absorbers, 2 OME rear leaf springs, U bolts, spring bushes and front torsion bar adjustment	

## CARTRIDGE REPLACEMENT

Additional work required to install cartridge per strut	0.5 hours
---	-----------

## TORSION BARS

Remove and replace a set of Bars (no removal complications)	1.5 hours
Remove and replace a set of Bars (removal complications eg. OE splines corroded)	2.5 hours

## MISCELLANEOUS

Caster kits	2.0 hours
Steering stabilisers	0.5 hours
Greasable shackles (complete vehicle set)	2.0 hours

## FRONT END WHEEL ALIGNMENT ADJUSTMENTS

Price
Live axle front end
Independent front end

The above fitting times are only a guide, and additional time may be involved due to vehicle modifications or pre-existing accessories which can interfere with the fitment of the suspension.
